

Predictable Esthetic Outcomes with Immediate Anterior Implants: The Socket Shield Technique

2 CE

Immediate

Socket Shield

Tuyen Nguyen
DDS

June 4 , 2026 | Thursday

Rosedale Tower - Roseville

1700 W Highway 36 Floor 9, Conference Room A, Roseville, MN 55113, USA

COURSE DESCRIPTION

Please join us for an informative and engaging presentation by Dr. Tuyen Nguyen.

This course provides practical, evidence-based guidance on atraumatic partial extraction and immediate anterior implant placement using the socket shield technique. Emphasis will be placed on preserving the natural facial bone and gingival contours while minimizing the need for flap elevation, bone grafting, or membrane use.

Participants will gain insight into a streamlined approach that allows for immediate provisionalization, with reduced patient discomfort, minimal bleeding and swelling, and predictable clinical outcomes.

Dr. Nguyen will review indications, contraindications, case selection, and key clinical considerations, along with step-by-step procedural protocols. This technique highlights guided implant planning and execution, eliminating the need for freehand placement. Real-world clinical cases, including photos and videos, will be presented to demonstrate techniques that can be immediately and predictably integrated into daily practice.

COURSE OBJECTIVE

By the end of the course, clinicians will be able to:

- Identify the indications and contraindications for the root shield (partial extraction) technique in immediate anterior maxillary implant placement without flap elevation, bone grafting, or soft tissue grafting.
- Describe and apply the step-by-step protocol for performing the root shield technique using clinical visuals, including photos and videos.
- Evaluate how general dentists can achieve esthetic, long-lasting anterior implant outcomes using guided implant planning, with or without specialist involvement.

TARGET AUDIENCE

Dentists. No pre-requisites required

COURSE DETAILS

Educational Method	Lecture
Credit Hours	2 CE
AGD Subject Code	690 Implants
Max Participants	24

TUITION

\$100

Cancellation Policy: A full refund is available up to 7 days prior to the course start date.

COURSE SCHEDULE

June 4 (Thu)

06:00pm - 06:30pm Registration

06:30pm - 08:30pm Lecture

08:30pm - 09:00pm Q & A

ABOUT THE SPEAKER

Tuyen Nguyen

DDS

Dr. Tuyen Nguyen is a first-generation immigrant dentist with a strong commitment to clinical excellence and continued education. He completed both his undergraduate and dental training in Minnesota, earning his DDS from the University of Minnesota School of Dentistry in 2002.

Since 2005, Dr. Nguyen has owned and operated Soft Dental in Rush City, a state-of-the-art facility designed to support comprehensive dental care. He has pursued advanced training across multiple disciplines, including endodontics, prosthodontics, oral surgery, and implant dentistry.

Dr. Nguyen is a Diplomate of the International Dental Implant Association (IDIA), founded by Dr. Arun Garg. Since beginning his implant training in 2015, he has placed nearly 1,000 implants and has developed extensive experience in guided implant surgery, including designing and fabricating his own surgical guides since 2019.

He has a particular clinical interest in immediate anterior implant placement using the socket shield (root shield) technique. After initially performing the procedure freehand, he has transitioned to a fully guided approach and has completed approximately 50 cases to date.

Dr. Nguyen is passionate about sharing his clinical experience and practical insights with colleagues, with a focus on predictable and efficient implant outcomes.

Disclosure: The speaker reports no relevant financial or non-financial conflicts of interest related to the content of this course.
