June 6, 2026 | Saturday

MegaGen America- Fair Lawn
39-40 Broadway, Fair Lawn, NJ 07410, USA

COURSE DESCRIPTION

The SPP Offline Course is a half-day, hands-on program designed to provide a comprehensive and practical introduction to the latest trends in digital dentistry.

Running from 9:00 AM to 1:00 PM, this course goes beyond traditional lectures—each participant will actively engage in the full digital workflow through guided, hands-on experience.

The program begins by helping clinicians assess their current position within the digital dentistry landscape, covering the complete workflow from intraoral scanning and treatment planning to design, 3D printing, and emerging technologies such as photogrammetry. Participants will then gain direct experience using intraoral scanners to troubleshoot common clinical errors, perform AI-driven crown design, and execute full-arch scanning using photogrammetry.

The course concludes with the fabrication phase, where participants will produce their own restorations using 3D printing, followed by post-processing procedures including cleaning and curing. A demonstration of full-arch prosthetic finishing—featuring gingiva staining and glazing—will complete the workflow.

The goal of this course is simple: to help clinicians understand, experience, and confidently apply digital workflows in their daily practice.

COURSE OBJECTIVE

By the end of the course, clinicians will be able to:

- Understand the full digital dentistry workflow, including scanning and planning, design, 3D printing and photogrammetry.
- Identify and troubleshoot common intraoral scanning errors in clinical settings.
- Experience an AI-driven crown design workflow from scan to final restoration.
- Perform and understand full-arch scanning using photogrammetry technology.
- Execute 3D printing and post-processing procedures, including washing and curing.
- Recognize the final esthetic finishing process of full-arch prostheses, including gingival staining and glazing.

COURSE DETAILS

Educational Method	1 CE Lecture 3 CE Participation
Credit Hours	4 CE
AGD Subject Code	690 Implants
Max Participants	30

TUITION

\$99

- Light breakfast and refreshments will be provided
- All workshop materials and equipment will be provided

COURSE SCHEDULE

Jun 6 (Sat)

09:00am - 10:00am	Digital Dentistry: Where am I now? (Overview)
10:00am - 11:00am	Hands-on: Intraoral Scanning, AI Crown Design & Phorogrammetry
11:00am - 01:00pm	Hands-on: 3D Printing & Post-Processing

ABOUT THE INSTRUCTOR

Tae Kim
Digital Specialist

Dr. Naz Majdi is dedicated to a comprehensive, collaborative approach to full-mouth rehabilitation. She earned her Doctor of Dental Medicine degree from the Medical College of Georgia in 2013 and went on to complete a competitive, surgically and prosthetically focused residency in Hospital Dentistry at the University of Colorado in 2014. During her residency, she developed a strong clinical foundation in complex case management and interdisciplinary care.

As the founder of the Majdi Method at Suwanee Dental Care, Dr. Majdi partners closely with general dentists and specialists to design and deliver predictable full-mouth and implant-supported rehabilitations. Her philosophy emphasizes clear communication, thoughtful treatment sequencing, and building strong, trust-based relationships with referring providers to achieve both functional and esthetic excellence for patients.
